# APPLICATION FOR BREEDPLAN

Please cross the box  
to indicate your  
Society of membership

**The Australian  
Poll Hereford Society Ltd**

**The Australian  
Hereford Society Ltd**

The Member elects to have its herd analysed with Hereford GROUP BREEDPLAN. The Member will continue to receive GROUP BREEDPLAN EBVs relative to the breed benchmark, with such EBV's directly comparable with EBV's from other herds participating in Hereford GROUP BREEDPLAN.

The member hereby acknowledges and agrees that:

- (a) The Members individual performance data will be included in Hereford GROUP BREEDPLAN with data obtained from other participating herds;
- (b) The ownership of all data is vested in Herefords Australia Limited (HAL) and such data will remain the property of HAL during the continuance of GROUP BREEDPLAN and subsequent to the cessation of GROUP BREEDPLAN;
- (c) HAL will use the data to calculate GROUP BREEDPLAN EBVs and use the results for research and/or the publication or dissemination of genetic evaluation reports, which reports will include information (selected at the discretion of HAL) regarding animals from each participating herd.

## ASSOCIATED HERDS

BREEDPLAN will only directly compare the performance information of calves that have been bred and weighed in the same herd. Consequently, in the situation where animals from two or more different HAL memberships are being managed as part of the same herd, it may be preferable to "associate" the herds with BREEDPLAN. The most common example is where members of a family (eg. children) have a small number of animals registered in their own name that run as part of the main herd on the property.

To "associate" herds with BREEDPLAN, a primary herd will need to be nominated. Only the primary herd needs to enrol in BREEDPLAN. All animals that are owned by the associated herd/s will then be treated by BREEDPLAN as if they are in the ownership of the primary herd (even though they are owned by different herds with the HAL).

## MAIN CALVING PERIODS

Specifying the main calving periods of your herd allows BREEDPLAN to customise the settings for your herd. This will ensure the results you receive from BREEDPLAN are optimised.

For example, BREEDPLAN will only directly compare the performance information of calves that have been born in the same "calving year". Usually the calving year is the same as the year of birth of the calf. However, for herds whose calving period runs into the next calendar year (eg. from November through to March), the "calving year" used by BREEDPLAN can be adjusted to span the period running across two different calendar years. This may be applicable to herds in northern Australia that calve over the summer months.
