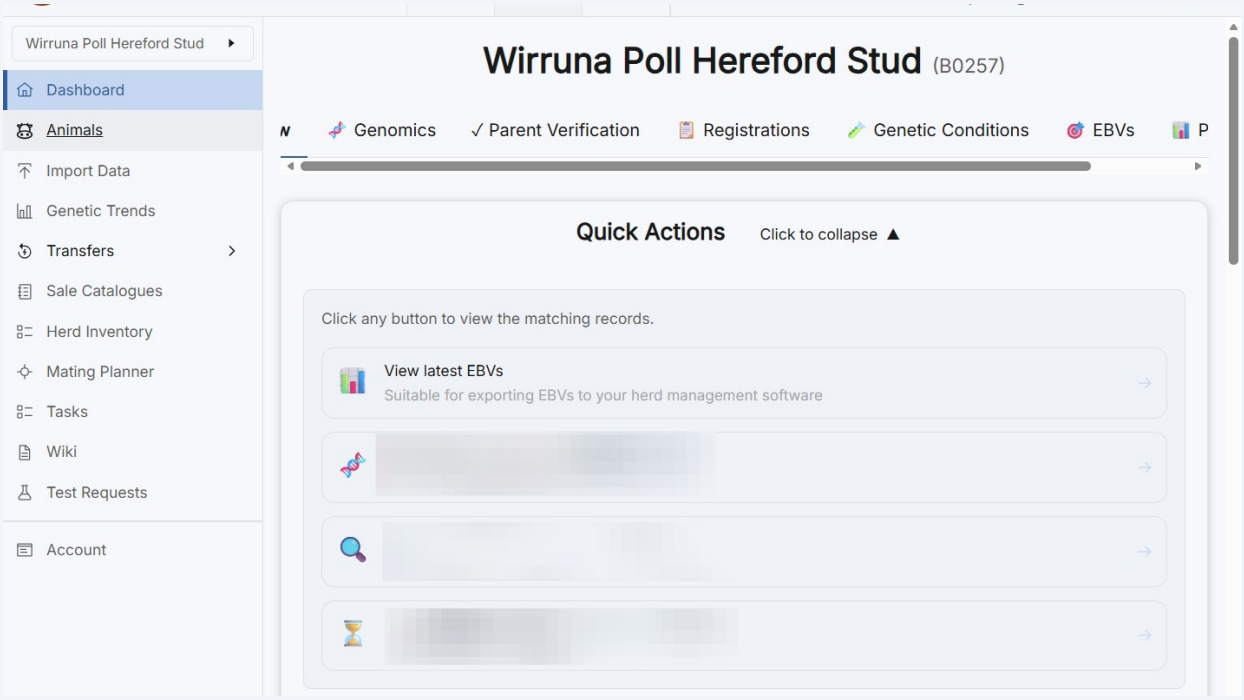
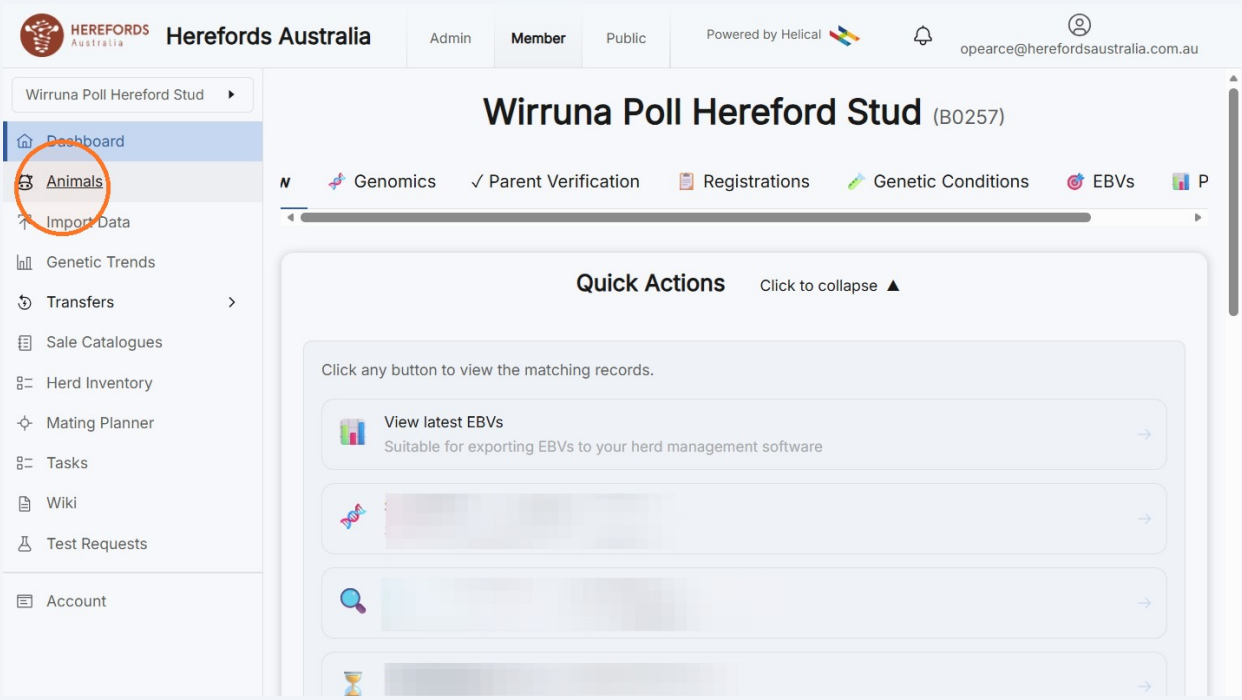
How to download your EBV's

Learn how to filter and extract specific Hereford cattle records using the animal database portal. This guide simplifies the process of applying status, year, and sex filters before exporting your results to a CSV file.

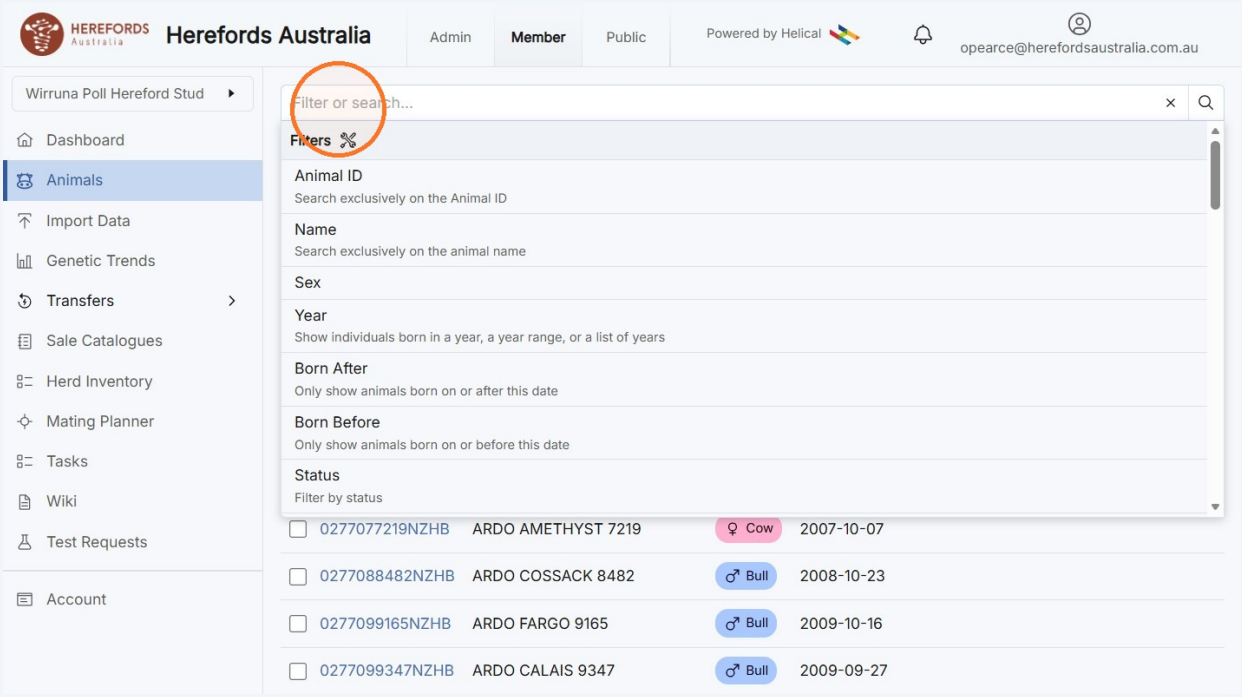
1 Navigate to your Helical dashboard



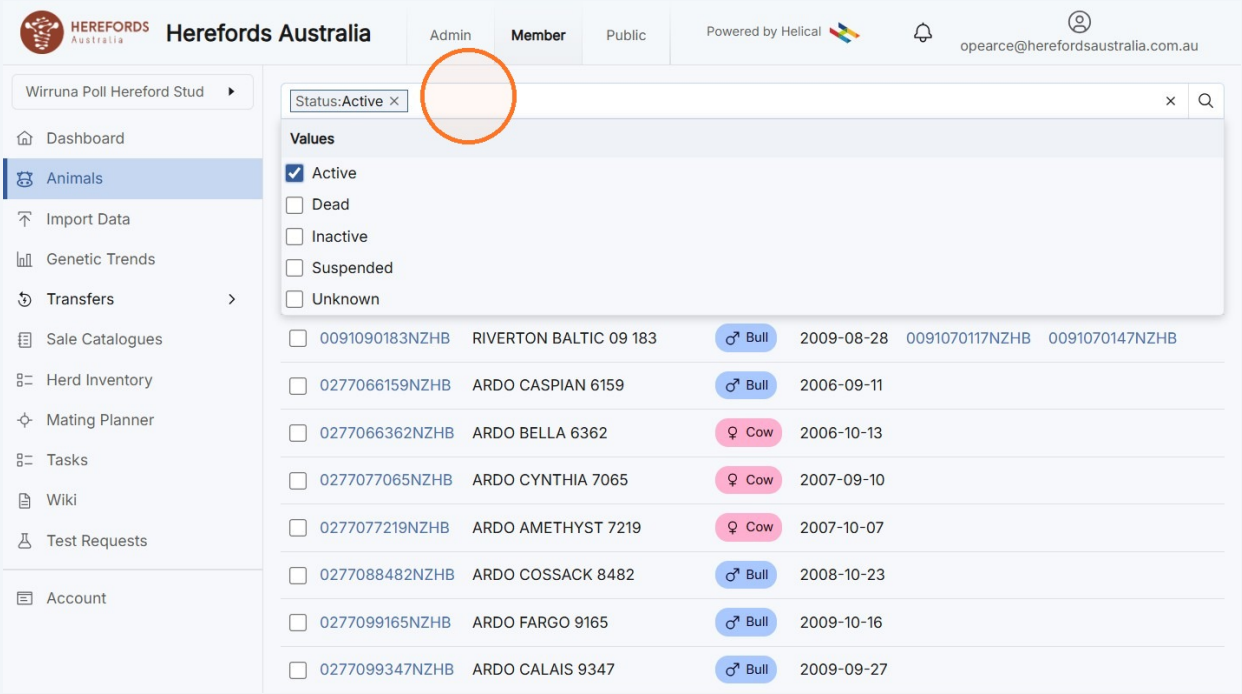
2 Click Animals.



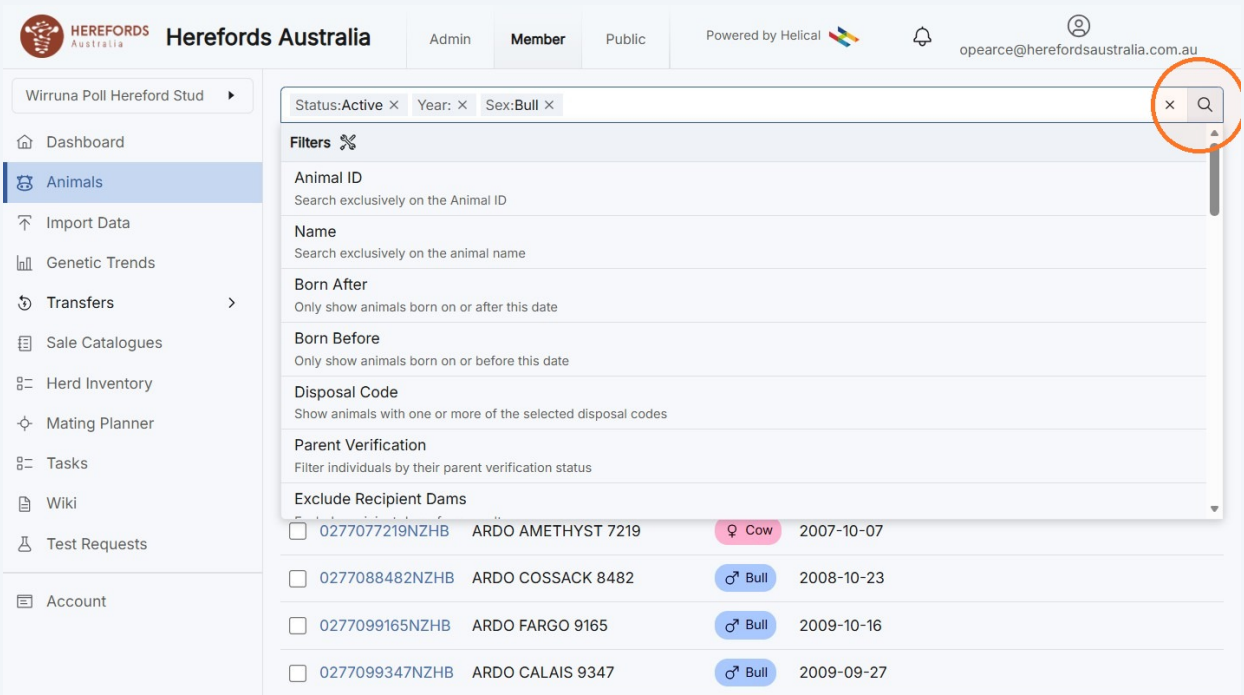
3 Click the "Filter or search..." field.



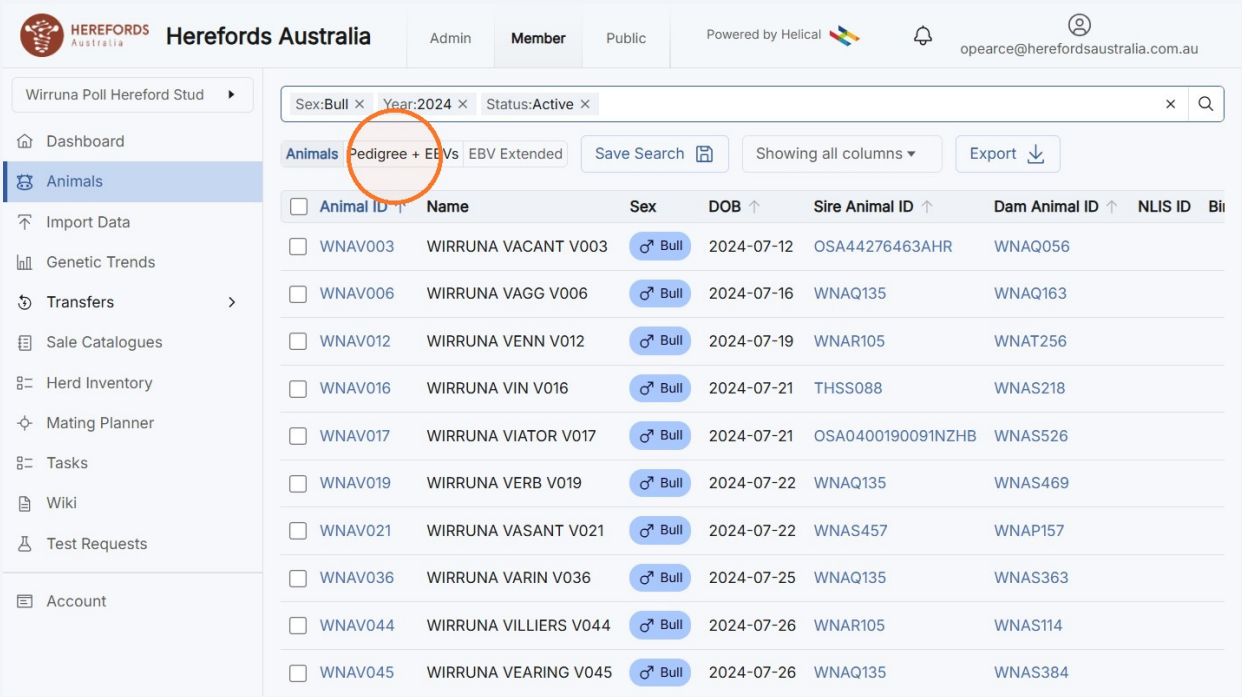
4 Enter the parameters that you want to search



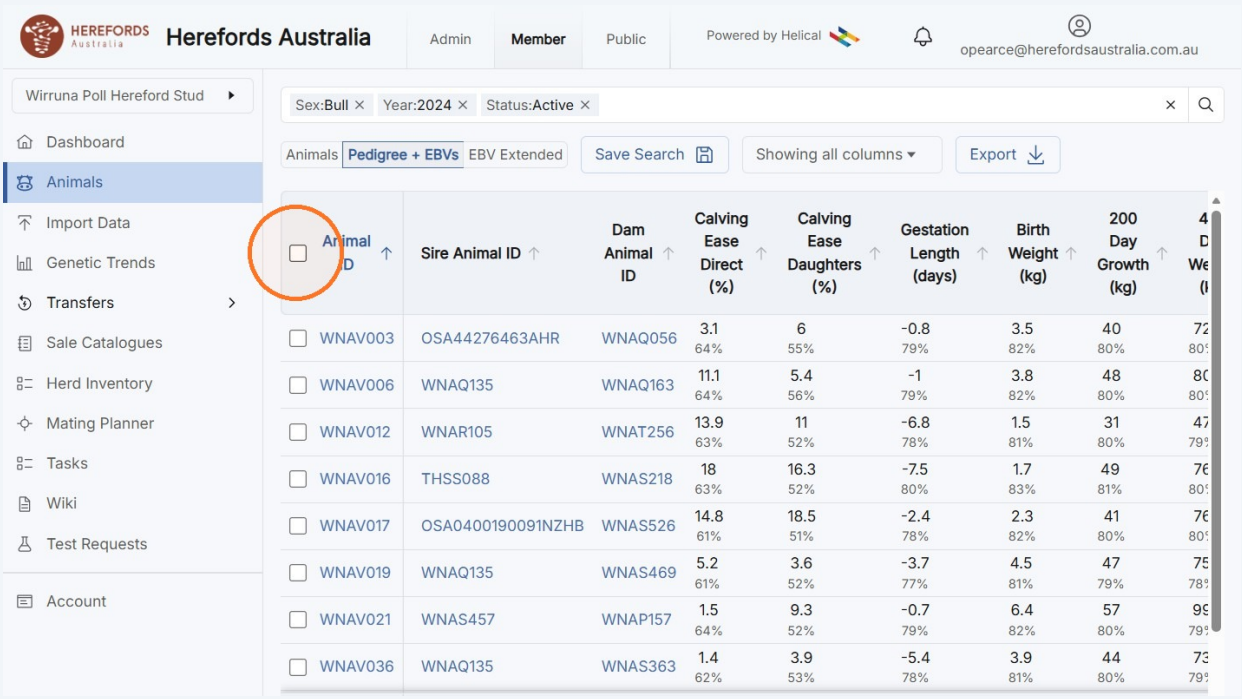
5 Click the search button.



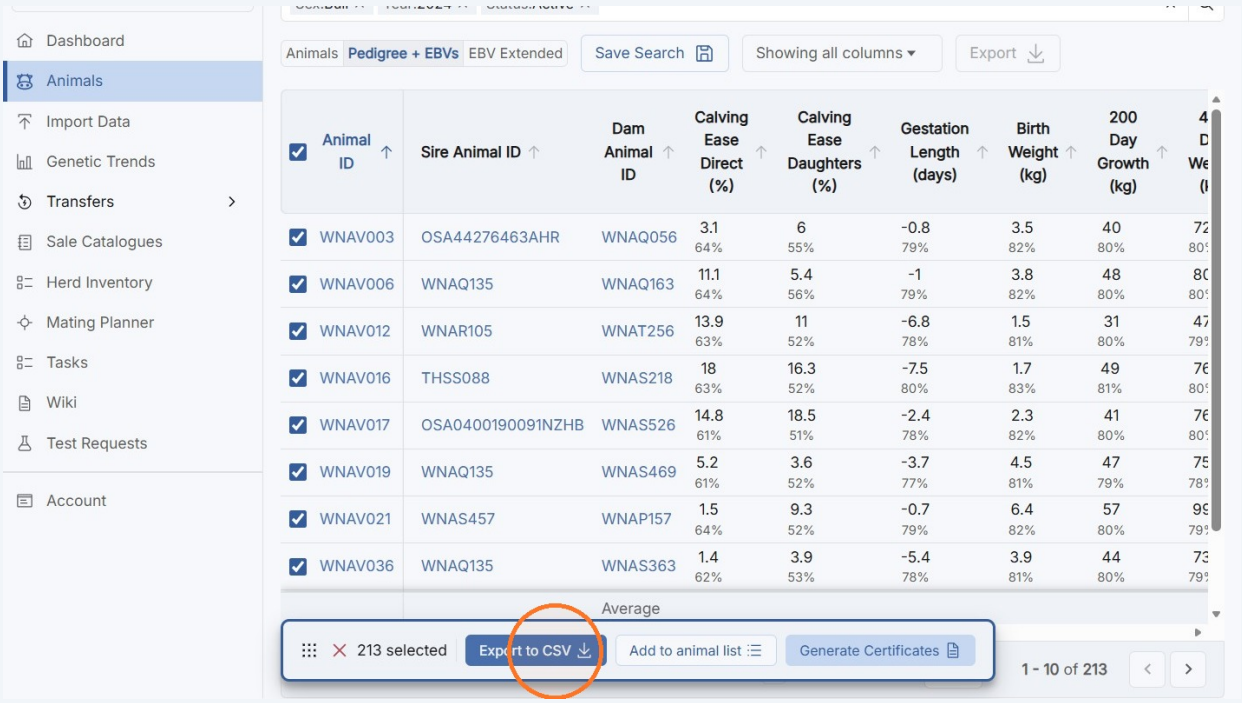
6 Click Pedigree + EBVs.



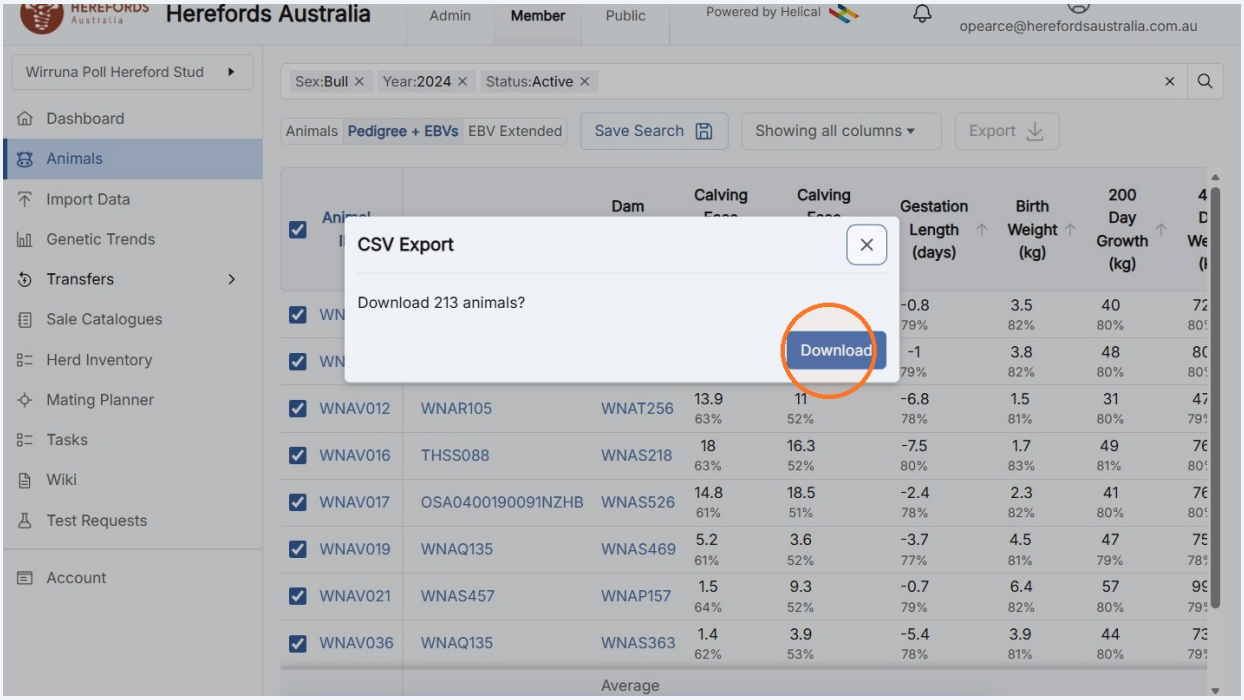
7 Select the header checkbox to select all filtered animals.



8 Click "Export to CSV"

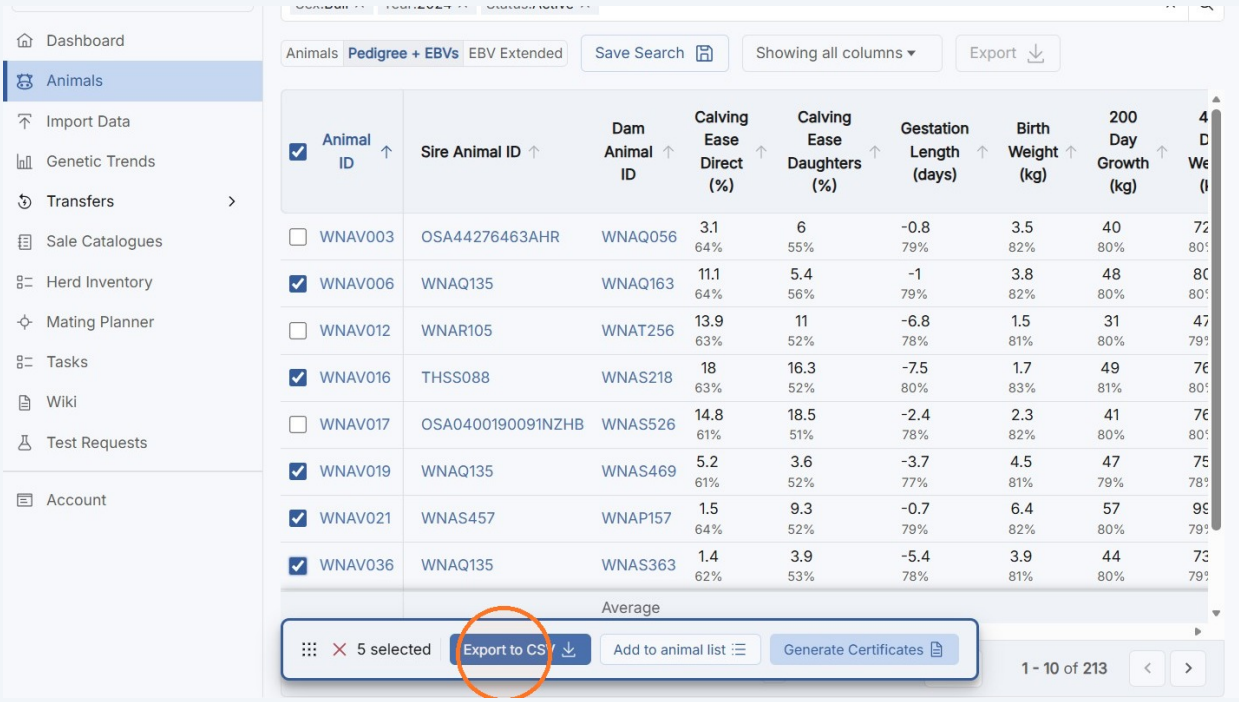


9 Click "Download"

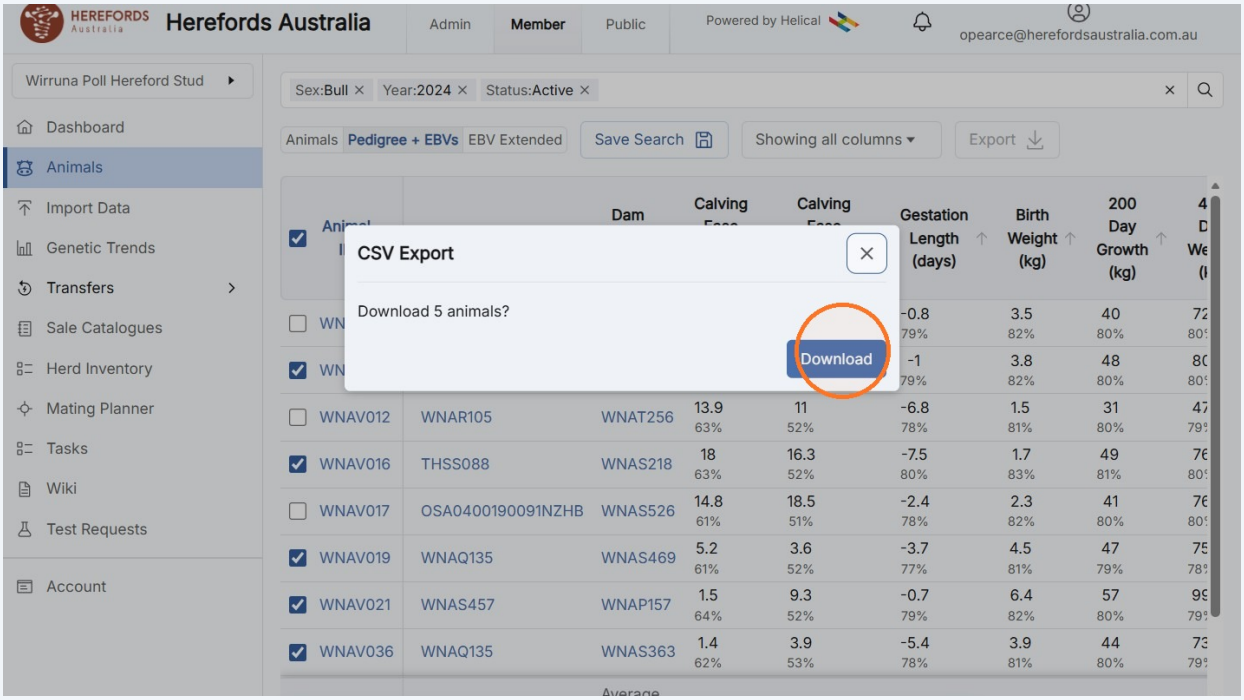


10 Alternatively, you can select individual animals by selecting the check box next to the ident of the animals you would like to search.

11 Click Export to CSV.



12 Click Download to save the CSV file.



13 The csv file will download to your desktop
