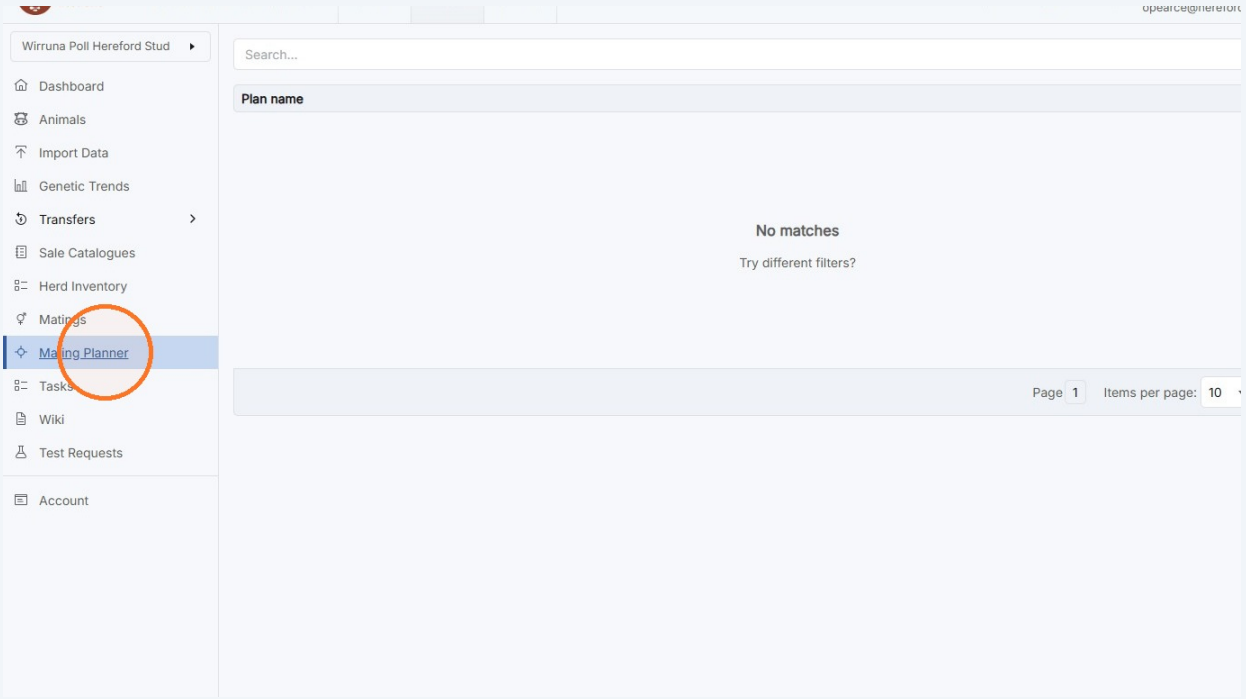
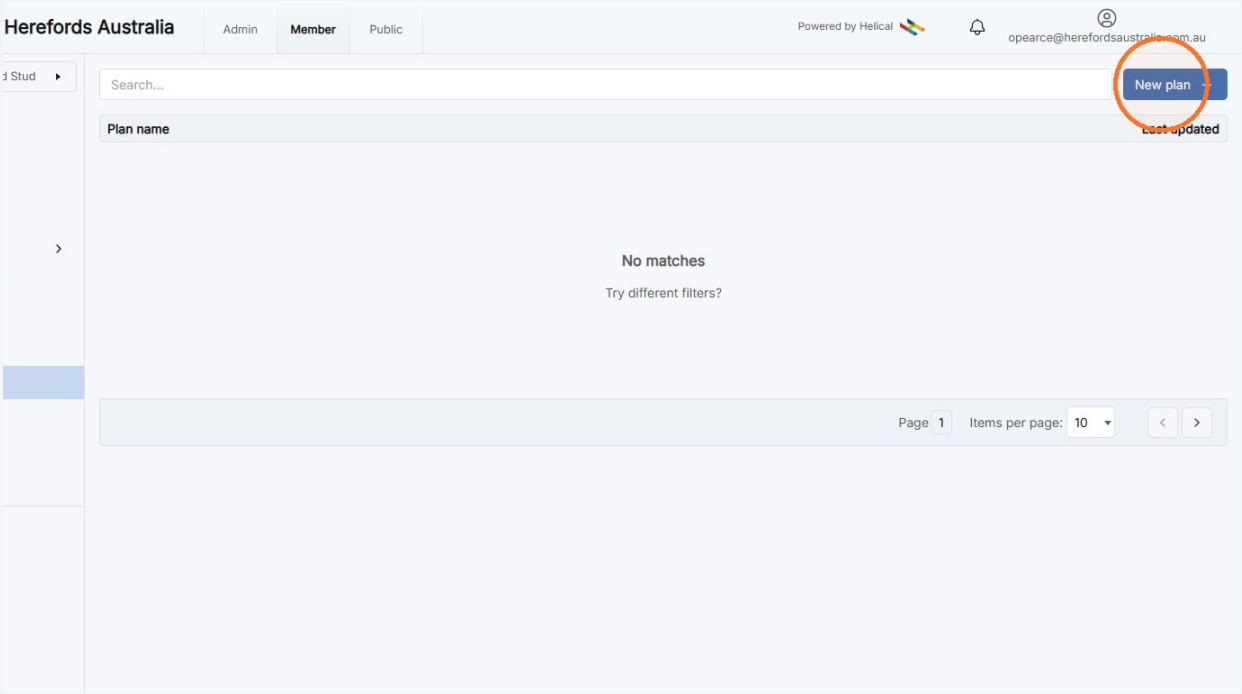
How to use the mating planner

Learn how to efficiently generate and manage mating plans for your herd using the Helical portal. This guide walks you through selecting specific dams and sires to optimise your breeding strategy and export your final analysis.

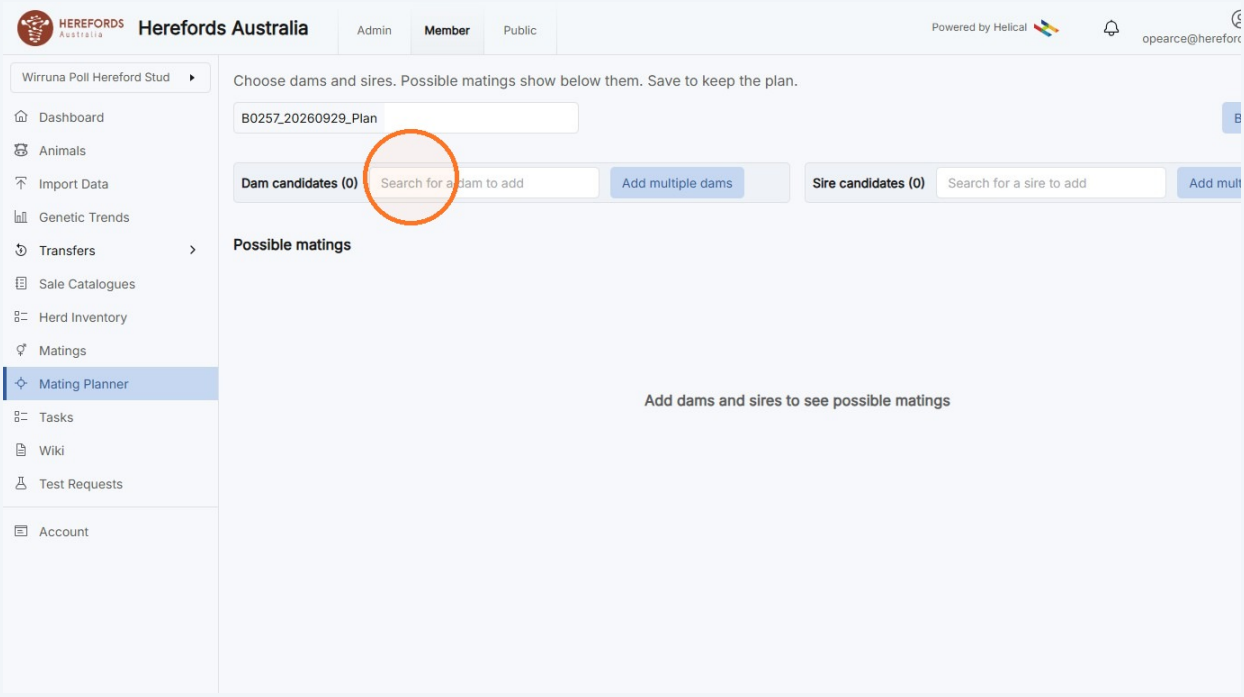
1 From your dashboard click "Mating Planner".



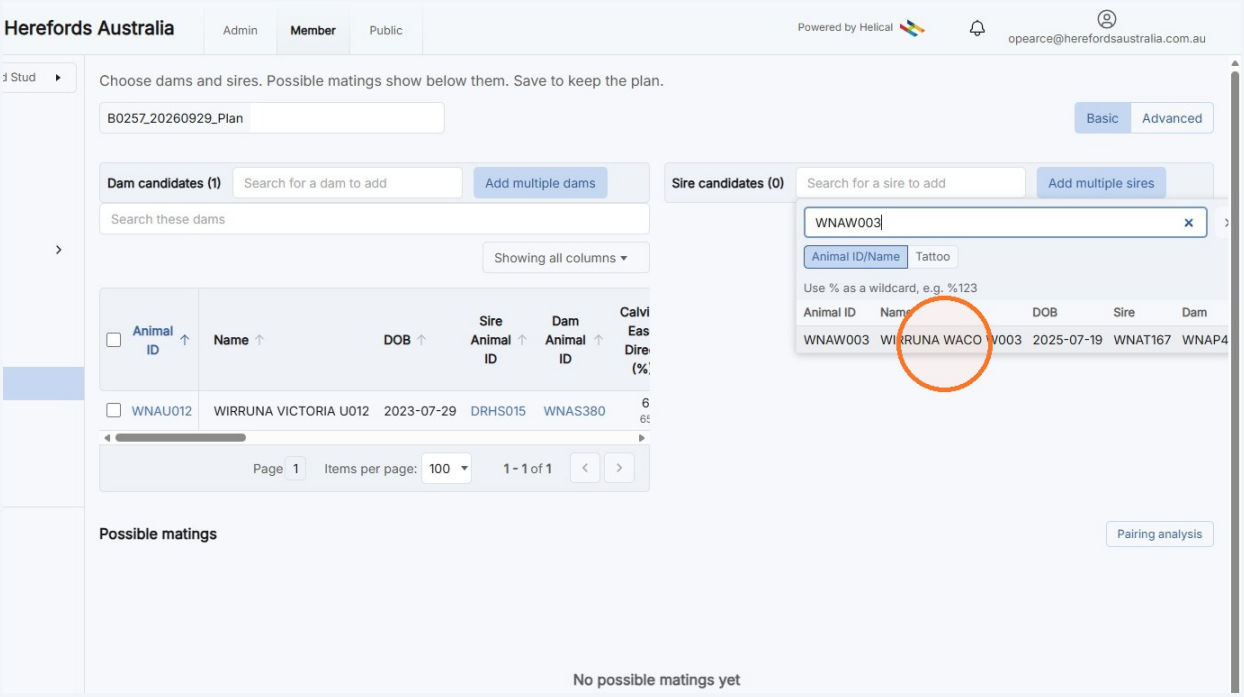
2 Click New plan.



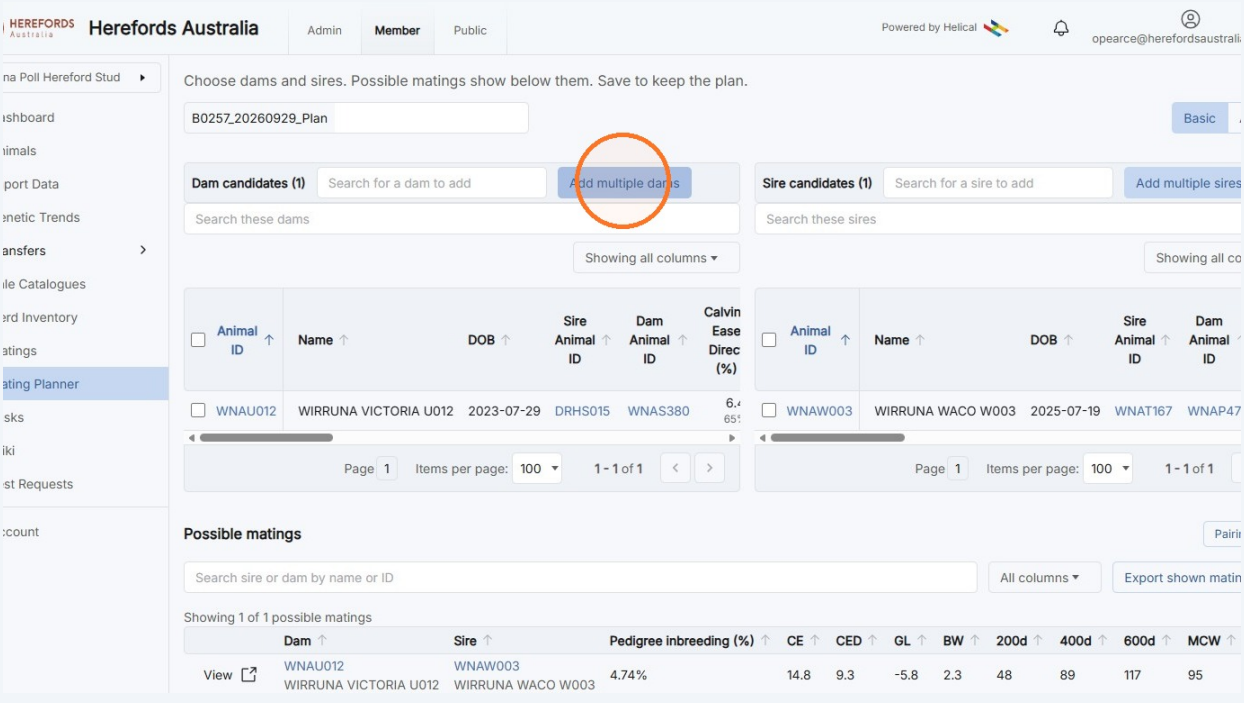
3 Add your dam and sire ID's.



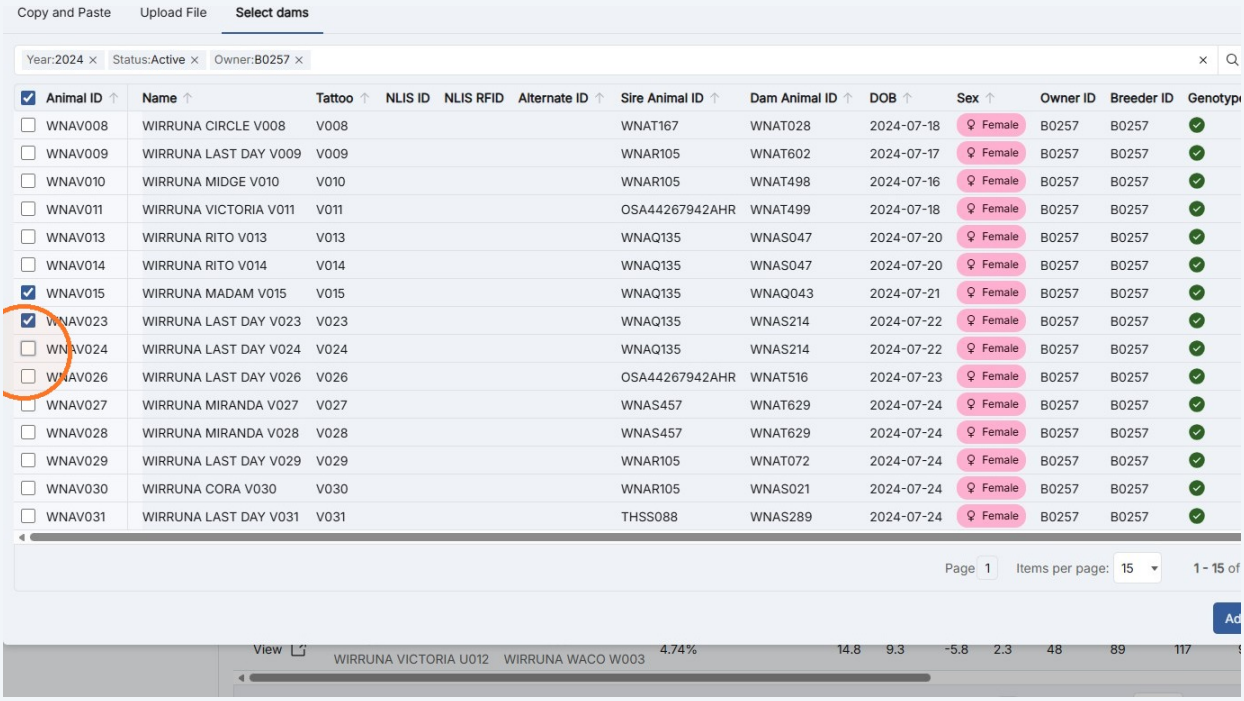
4 If there are possible matings they will show below. You can click "Save the plan" or "Export shown Matings". In this example no possible matings yet have been found.



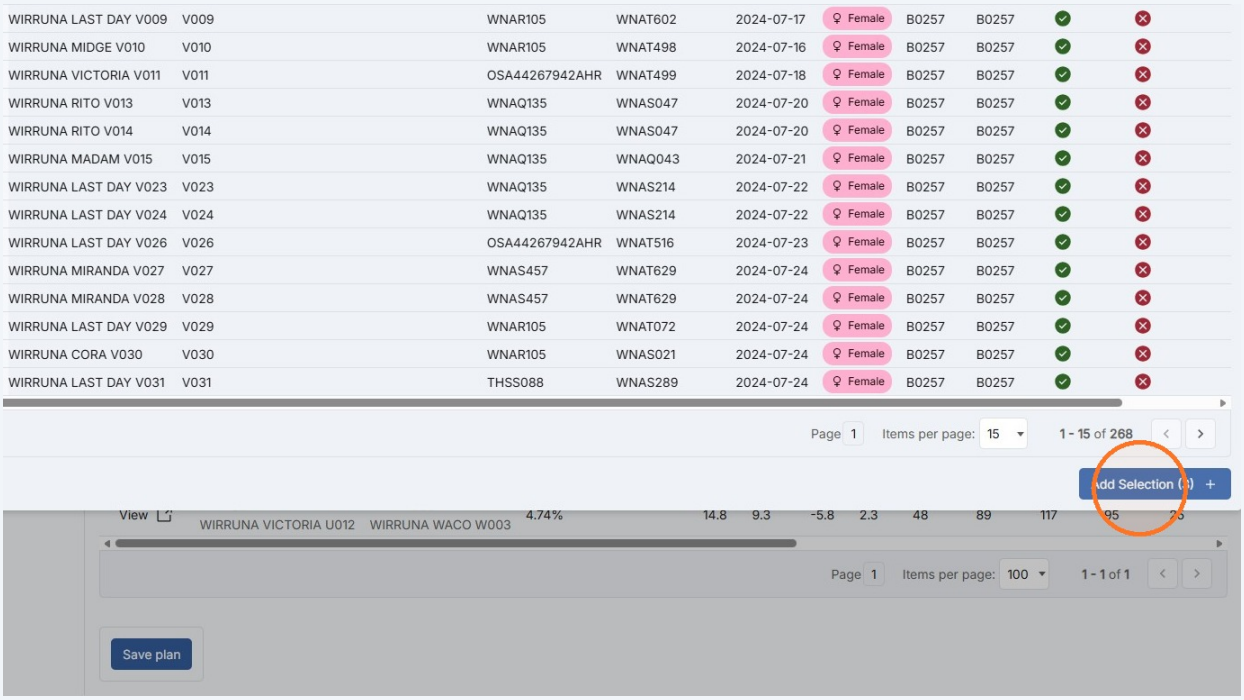
5 To expand your search you can look at multiple dams and sires. Select "Add multiple dams/sires". Adding more dams and sires will give you results for all of the possible mating's from those animals.



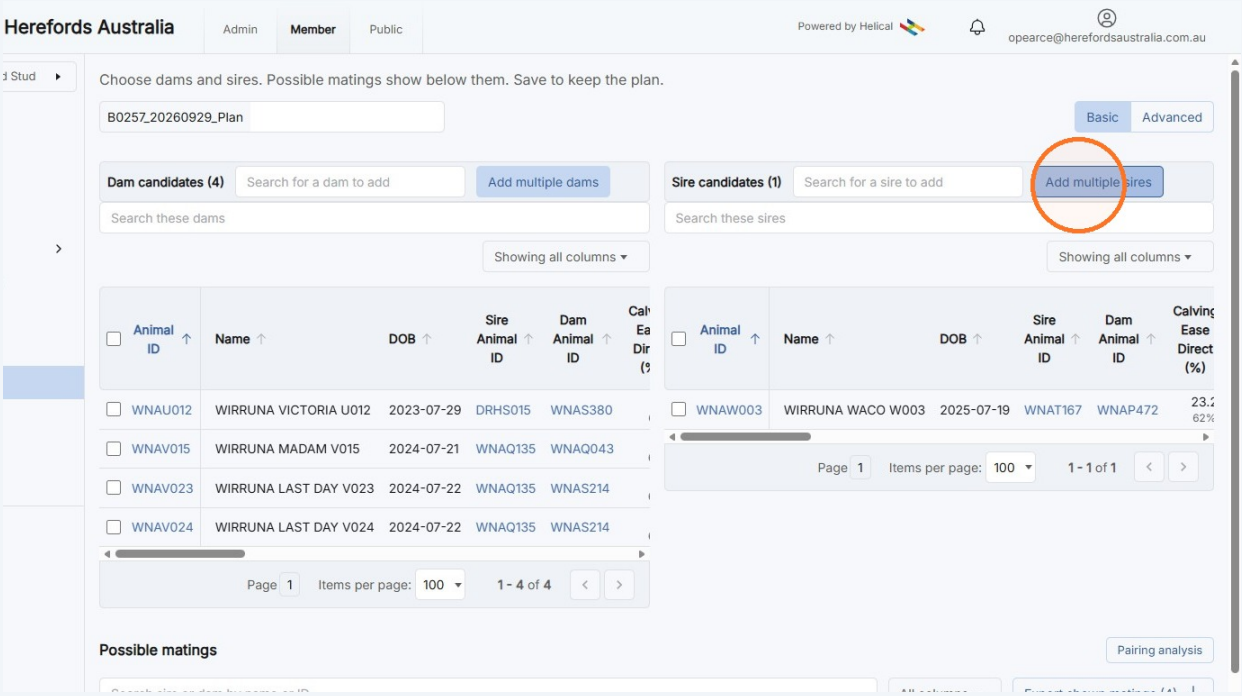
6 Search and select the dams.

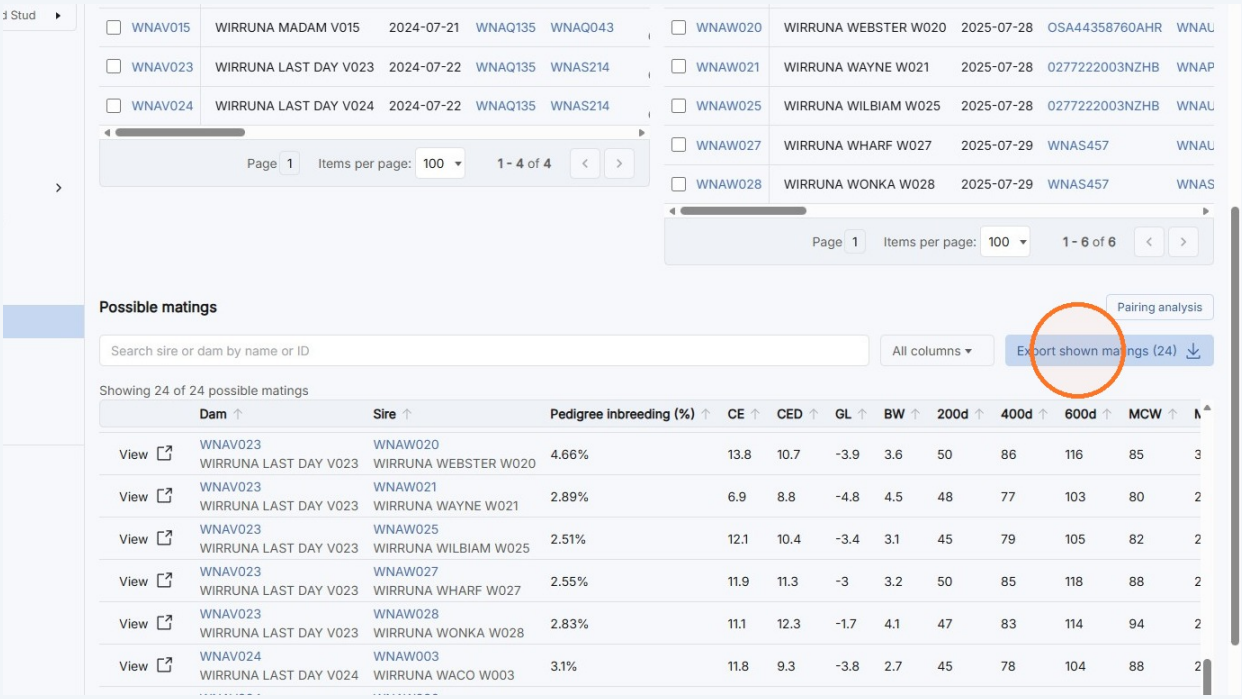


7 Click Add Selection.



8 Repeat this step for multiple sires.





9 The possible matings will list below. You can "Save the plan" or "Export shown matings" to download a file.
